Look at the top half of this page! How many times have you seen the glazed-over look in the eyes of your board members as they try to make sense of the financial report presented to them? Many times they simply give up.

Now look at the bottom half of this page. This digital dashboard makes it easy for anyone to understand at a glance where your church stands financially. Simple graphs enable you to compare this year with last year. A simple dial helps you to evaluate expenses to giving for the current year. Green, yellow or red warning lights keep you aware of key factors in your church's health. And all of this is done for you as one of the ways that the Central District adds value to your ministry.

You asked us for help in gaining a clear financial picture of your church's health and this financial dashboard is the result. We listened, we invented, we designed and refined, and we hired a top programmer to make this available to you. Your church can use this at no charge because we exist for you.

We will provide simple training so you can use this immediately. Read the enclosed brochure for details.
